Subject: Country of Manufacture and Melt Identification for Uniti Certifications.

Titanium material supplied by Uniti Titanium can have several heat number formats. The country of melt can be identified by understanding the alpha numeric format as follows:

The following heats were melted in the United States of America

- Heats with four alphanumeric characters followed by an "EM", "UC", "HM", "T", "W", or "WC".
- Heats that start with "EM", "WC" or "UC" followed by four or five alphanumeric characters.
- Heats that start with the letter "W" followed by three alphanumeric characters.
- Heats that have six digits followed by the letter "W".

The following heat numbers were melted in Russia.

- Heat numbers that begin with six digits followed by the letter "R".

The following heat numbers were melted in the Ukraine.

- Heats that start with "VS" followed by four digits.

I have included the following heat numbers as random examples of what you may see on one of Uniti's material certifications.

Heat Number	Country of Melt
UCR8B18	USA
EMR7F24	USA
216039R	Russia
VS0815	Ukraine

In regard to the country of manufacture, all of Uniti's plate and sheet products are manufactured in the United States, unless otherwise stated on the certification.

Feel free to contact me if you have any questions in regard to a particular heat number.

Best Regards,

Chris E. Wilson
